Property Search

Website Content Version 1.0 Updated 8 October 2026

How the search bar works and what filters visitors can use.

Property Search

The search bar on your homepage helps visitors find properties quickly.

What it does

Visitors can search by city, locality, budget, property type, and bedrooms.

Available filters

* City / Locality
* Buy / Rent
* Residential / Commercial
* Price Range
* BHK

Where the data comes from

All property data comes from the CRM Properties module. Add or edit properties there and they appear in search results automatically.
